

Corporate Profile

KG Infosystem

About Us

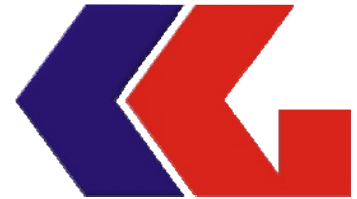

KG Infosystem Private Ltd. Is an Integrated technology solution company. With corporate office at Okhla phase-1 New Delhi, provides customized networking, telecom, home automation ,security solutions etc to corporate , Stock brokers, Government sector, builders & retail client. With wide experience & expertise of the industry over 10 years and qualified team of Professionals KG brings a fresh & innovative approach to deliver services with goal to exceed the expectation of every client by offering outstanding product solution, excellent customer service & great value add, thus optimizing system functionality & improving operational efficiency.

KG Infosystem has expertise in end-to-end system integration and is India's most known broad-spectrum advisory in the area of Technology Infrastructure and network management. KG specializes in Technology Infrastructure Services, Telecom Solutions, Smart automation for Homes, hotels & resorts, Intelligent surveillance, Mobile Apps, Software development etc.

KG Infosystem is run by team of highly professionally qualified young entrepreneurs who have the vision to change the way the world thinks of technology. Their focus is to take advantage of technology and ease the life of business, corporate & individuals.

IT Infrastructure Service

1 Technology Infrastructure Consulting

- Strategy Consulting
- Data Center Optimization & Consolidation Consulting
- Infrastructure Solutions - Architect & Design
- Servers & Storage Solutions
- Performance Engineering
- Disaster Recovery
- Enterprise Voice and Contact Centers
- Network management and security services
- Process Consulting - IT Operations
- Remote Access/ VPN Implementation and Administration

2 Enterprise Solutions

- System Integration
 - Infrastructure Review, Analysis, & Remediation
 - Infrastructure Design, Implementation & Optimization (LAN/WAN)
 - Office Relocation Services (Disconnect/Reconnect)
 - Merger & Post-Merger Technology Integration
 - Platform Migration & Roll-outs
 - Data Networking Solutions
 - WAN Connectivity (VPN, Hybrid Networks, Wireless Networks)
 - Storage Solutions
 - IP telephony

3 Contact Centre Solutions

- Multimedia Contact centre design and implementation
- IVR and IWR self service strategies
- Customer interaction management solutions
- Call center management application and tools
- Audit and re-engineering

4 Security Solutions

- Security Device management - Log Analysis
- Security Information management - Event management
- Anti-Virus management
- User access prevention
- Data Loss prevention

5 Data Centre Solutions

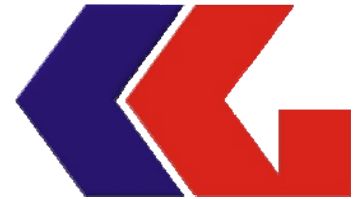

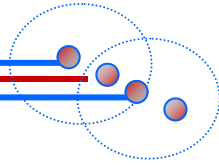

- Maintain & Manage
- BOT (Build Operate Transfer)
- Turnkey Management

Telecom Solution

Access Network on PTMP, MPTP & Wimax

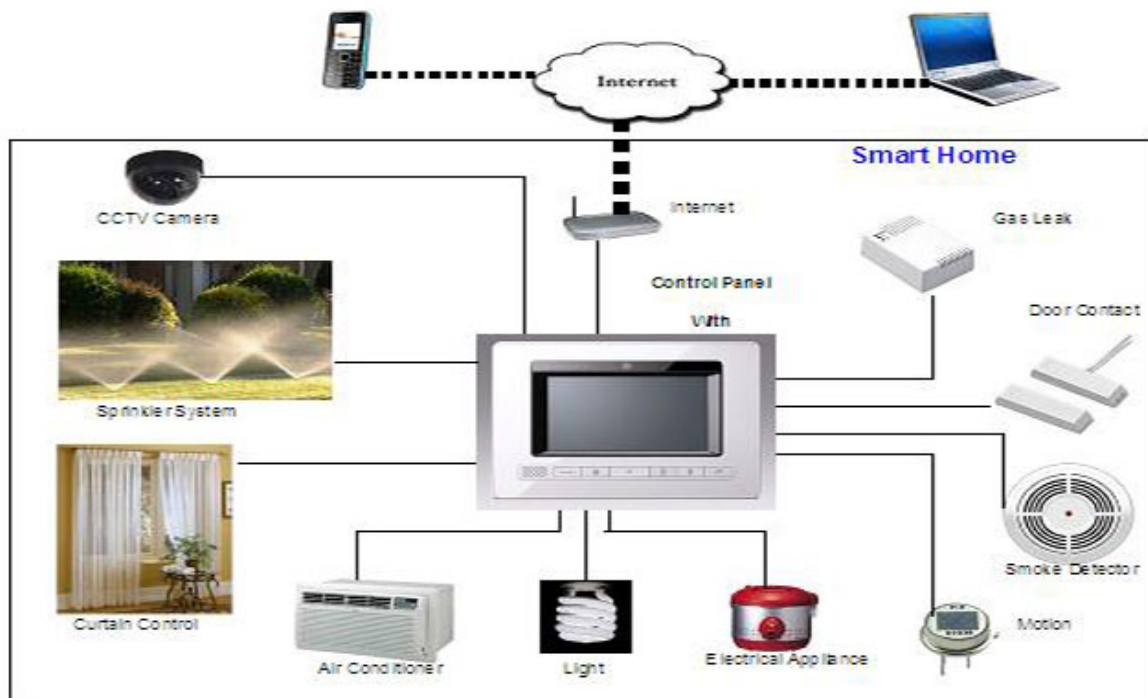

Backhaul Network on Wireless & Fiber

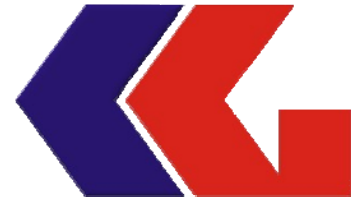

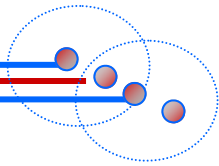

Telecom network

KG Smart Home is designed with the objective of enabling a secure and comfortable lifestyle for the urban Indian home owners. Home automation that brings in luxury of modern lifestyle along with safety & security for your home & family at your finger tips on **Mobile, Laptop , remote & Touch screen Panel**.

Our solution handles all your household appliances from a single screen. Apart from this, it also provides you with highly advanced security features that ensure your safety. These features include a mechanism to lock your house and be alerted in case of a break-in, an LPG leak detector, a Video and audio door bell that lets you see, with utmost clarity, who is at your doorstep. KG Smart Home also has a jukebox function which features an inbuilt music player. All sensors & products used in solution are UL certified. All of these are enabled keeping in mind the comfort, flexibility and mobility of the home-owner. All the actions possible by control panel are also possible by any internet connected device like a PC, laptop or GPRS enabled cellphones. Whether you are building or want to enhance your existing home, anyone can enjoy the benefits of a smart home. You can even start small and add to the system as your lifestyle changes.

KG has been successful in deployment of integrated surveillance and analytics solutions at many places. We have partnerships with various companies who have research and development capabilities to understand the needs of various customers and can develop them as per the requirement. Also our partners are OEMs who bring state of the art products and our team selects the best product which fits in our customer requirement and budget. Along with getting the state-of-the-art products, we provide following value added services to customers to enable smooth technology deployment and integration:

- Installation, Commissioning and Training of Surveillance systems
- Integration of surveillance systems with other systems like access control, PA system etc
- Customization of products for specific customer needs. Examples of customizations are:
 1. Integration of mobile DVR with GPS system
 2. Enabling mobile streaming of video from a camera to enable portable surveillance/imaging
 3. Additional intelligence over surveillance system

We have expertise to design, build and maintain Surveillance Solution for all Scenarios

City Surveillance

Traffic Management

Transportation

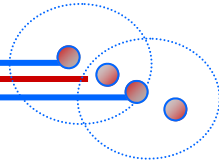

Bus Stands

Factories

Government

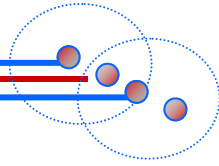

KG brings in partnerships with best OEMs in the industry and has gained expertise of deploying the GPON network in various scenarios for various domains.

A GPON consists of an optical line terminal (OLT) at a central point which interfaces to the central servers/control equipment and a number of Optical Network Terminals (ONTs) at the end point to deliver services to the end users. End points may be guest rooms, individual apartments or properties, presentation suites, conferencing suites, network switch rooms etc. A GPON configuration drastically reduces the amount of fiber and removes the need to install multiple copper cables to each user outlet by multiplexing all the technical services required by end users over a single fiber cable network.

Downstream and upstream signals are broadcast to Optical Network Terminals sharing a single fibre. Encryption can be used to provide security and prevent eavesdropping.

GPON solutions can deliver very fast broadband speeds to the end-user allowing the network operator to offer advanced triple play services to end users, utilizing a single fibre connection to the network terminal, these include:

- High Speed Internet
- VoIP Telephony
- Traditional Analogue Telephony
- Standard or High Definition IPTV
- Terrestrial/Cable/Satellite Television
- Video on Demand
- Security Systems Interconnection
- Fire Detection Systems
- Door Access Systems
- Automated Billing Minibar Systems
- EPOS Terminals
- CCTV Monitoring
- Wi-Fi Access
- Digital Signage
- PMS Integration

We provide product engineering services in the mobile domain. KG works in collaboration with its clients and associate partners to create cutting edge innovative products and services for Symbian, Windows Mobile, Android, Blackberry and phone Platform.

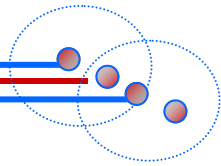

We provide customized mobile applications catering to specific needs of organizations. Advancement in Mobile Technology has brought greater computing power in the hands of individuals. Smarter devices coupled with faster communication technologies are playing crucial role in migration from desktop to the mobile space. KG, with its clear focus, is well positioned to take leverage of the arising opportunities in the growing mobile technology space. KG's strong expertise on the different mobile platforms has enabled it to harness the power withheld in these mobile devices to create some of the wonderful innovative products for the various platforms. We consistently endeavor for further refinement and expansion of our expertise into the latest technological developments in mobile space. Our current skills and expertise relevant to mobile space are in the following

- Bluetooth and GPS Technology
- WML/WAP
- Windows CE
- Java ME Platform (All Major vendors device specific Libraries)
- Android Specific Java SDK
- S60 Platform Symbian SDK
- Symbian UIQ (Sony Ericsson and Motorola)
- BREW Content Platform for CDMA based Networks.
- Flash Lite
- iPhone SDK, MAC OS and Xcode IDE Tools
- Speech Recognition Technologies
- VOICE Compression Technologies
- VOICE XML, IVRS Applications
- Blackberry Application Development
- Android Application Development
- SIM Application Toolkit

IT Service -Computer Peripherals

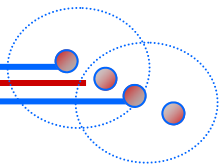

S.No	Product Profile	Description	Brand
1	Cabling	End to End structured Cabling Solutions	
2	Racks	Server & Networking	
3	Desktops & Laptops	Supply, Installation and AMC	
4	Printers, Scanners & Peripherals	Supply of computer peripherals	
5	Servers	Supply & Installation of servers	
6	Networking	Switches Managed & Unmanaged, Routers, IP Telephony etc	
7	Security	Firewall , Log Management	
8	Antivirus	Antivirus supply and solutions	
9	Software's	OS and others	
10	Wi-Fi	Wireless Solution -Indoor, Campus & Outdoor	
11	UPS	Power solutions	
12	Lease Line Modems, Lanex tenders, Interface Convertors, MUX,VOIP.	Supply and Installation	
13	Surveillance	Cameras, LCD,DVR solutions	

Category	Item	Sub-Item	Details
Systems	Linux	Mail Servers	Sendmail, Qmail, SquirrelMail
Systems	Windows	Mail Servers	Exchange
Systems	Linux	Web Servers	Apache with/without SSL with DSO or static Modules, Tomcat, JWS for Servlets and JSP with Apache integration
Systems	Linux	File Servers	Samba, NFS, FTP LDAP: OpenLDAP
Systems	Linux	Proxy Servers	Squid
Systems	Linux	Network Authentication	Radius
Systems	Linux	Network Services	DNS
Systems	Linux		DHCP Server
Systems	Linux		File Transfer Protocol (FTP) Server
Systems	Linux	Terminal Servers (for thin clients)	LTSP
Systems	Linux	Firewall & VPN	Implementation of IP Tables / IP Chains and OpenVPN
Systems	Windows	MS Windows NT / 95 / 98 / 2000 / 2003 / XP	
LAN	Layer2,layer3	Cisco,3 Com,Nortel,Huawei,Maipu	Designing, Impletation, Consul-tancy,Maintaining networks
WAN	VPN,Lease Lines,VSAT,Acceleration,etc	Cisco,3 Com,Nortel,Huawei,Maipu,Bluecoat,Packet Shaper	Designing,Consultancy,Maintaining networks & Hybrid Networks
Desktops and Peripherals	IBM,HP,Any	Folder Mangement,backups,Patch manage-ment,OS Management,etc	
Servers	IBM, HP,SUN	RAID 1, RAID 5, Installation, Storage,Cloud computing	
Security	Cisco,watchguard,Fortiga-te.	VPN Tunnel, Policies, Management, b/w sharing, b/w monitoring, Traffic monitor-ing	Designing,Implentation,IPS,IDS,Security Au-dit,etc
IP Telephony	Asterisk,Cisco,Nortel	Designing,Implementation,Management, Customisation	
Managed Services	24x7 Monitoring	Networks	
	Helpdesk 24x7	Technical Helpdesk	
	FMS	Onsite	
	SOC	Security Monitoring	Network, Applications, Desktops,etc
